Docket No. 50-10
Docket No. 50-237
Docket No. 50-249

Commonwealth Edison Company
ATTN: M. D. Lyster, Site Vice President
Dresden Station
6500 North Dresden Road
Morris, IL 60450

Dear Mr. Lyster:

SUBJECT: PHYSICAL SECURITY INSPECTION AT DRESDEN

This refers to the inspection conducted by Mr. T. J. Madeda of this office on December 6-8 and 14-16, 1993. The inspection included a review of activities authorized for your Dresden Nuclear Power Station, Units 1, 2, and 3. At the conclusion of the onsite inspection, the findings were discussed with you and other members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations of activities in progress.

No violations of NRC requirements were identified during the course of the inspection.

The NRC inspector noted some signs of a reduction in the effectiveness of described protected area search activities for personnel and packages. Management attention should be considered to ensure that further degradation does not result in unacceptable searches. Overall, however, security program performance was good.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR Part 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material will not be placed in the Public Document Room.
