Mr. L. T. Clevenger
Executive Vice President
Southern Illinois Power Cooperative
Route 2, Box 255
Marion, Illinois 62959

50-44A

Dear Mr. Clevenger:

The NRC staff is conducting an antitrust analysis of the Commonwealth Edison Company (Commonwealth) operating license application for the Byron 1 nuclear unit. This analysis seeks to assess whether there have been significant changes in Commonwealth's activities since the Byron 1 construction permit antitrust review was completed in April, 1974. To assist us in our analysis, would you please respond to the items of inquiry listed below:

- (1) Information identifying for the year 1981 or most recent year available your wholesale customers, generation capacity (MW), peak load (MW), sources of purchased power, and total miles of transmission lines, by voltage.
- (2) Has your electric system sought participation in the Byron / Braidwood or Carroll County nuclear units and, if so, what has been Commonwealth's response? Please supply any relevant documents.
- (3) Has your electric system sought any type of bulk power service, including coordination service and transmission service, from Commonwealth since April, 1974, and, if so, what has been Commonwealth's response? Please supply any relevant documents.

Your cooperation in supplying us this information, if possible, within 30 days, will be greatly appreciated.

Sincerely,

A. L. Toalston

Argil Toalston, Chief
Antitrust and Economic Analysis
Branch
Division of Engineering
Office of Nuclear Peactor Regulation
