John W.N. Hickey
Chief, Enrichment Branch
Division of Fuel Cycle Safety and Safeguards
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

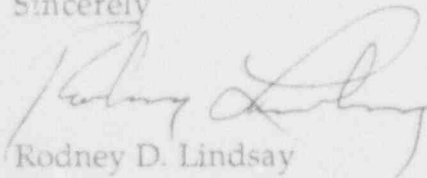

Sir:

I have read the Draft Environmental Impact Statement prepared by the Nuclear Regulatory Commission, and in light of the overall favorable comments published therein, I urge you and fellow members of the NRC to support the findings of the DEIS and expedite the licensing process for the Louisiana facility.

It is paramount that the U.S. consider alternative energy sources and strive for independence from foreign suppliers of such services. Continuing to license nuclear plants not only achieves this goal of providing more efficiently generated energy, but also intelligently looks to the future by paving the way for more discovery.

Again, I urge you to seriously consider this reality, and act swiftly.

Sincerely

Rodney D. Lindsay
