NOTICE OF VIOLATION

Community Medical Center

License No. 21-17157-01

As a result of the inspection conducted on November 5, 1981, and in accordance with the Interim Enforcement Policy, 45 FR 66754 (October 7, 1980), the following violations were identified:

Condition 14 of your license requires that licensed material be possessed and used in accordance with the statements, representations, and procedures contained in application dated August 17, 1976 and letters dated June 21, 1977, August 31, 1977, November 3, 1977 and November 28, 1977.

1. In "Calibration of the dose calibrator", which was submitted with the referenced application, you state that "known quantities of radionuclides will be ordered from manufacturers monthly for this purpose, e.g., 50 mCi of 99m Tc. At the precise time the activity has been precalibrated, the dose calibrator will be calibrated. Linearity of response is checked by checking the readings hourly versus the calculated activity".

Contrary to this requirement, as of the date of this inspection, you failed to check the linearity of your dose calibrator since at least March 1981.

This is a Severity Level V violation (Supplement VII).

2. In "Instructions for Performing Surveys", which was submitted with the referenced application, you state that "a radiation survey is to be performed routinely in areas where isotopes have been used. A record of this survey is to be entered at least once a week."

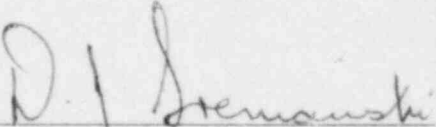

Contrary to this requirement, as of the date of this inspection, you failed to record the results of your area surveys since February 17, 1981.

This is a Severity Level VI violation (Supplement VII).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Under the authority of Section 182 of the Atomic Energy Act of 1954, as amended, this response shall be submitted under oath or affirmation. Consideration may be given to extending your response time for good cause shown.

Dated

12/10/81

  
D. J. Sreniawski, Chief  
Materials Radiation Protection  
Section 2
