August 17, 1982

DIRECTOR OF NUCLEAR REACTOR REGULATION  
ATTENTION DARRELL G EISENHUT DIRECTOR  
DIVISION OF LICENSING  
U S NUCLEAR REGULATORY COMMISSION  
WASHINGTON D C 20555

DOCKET 50-312  
LICENSE NO. DPR-54  
LICENSE TO RANCHO SECO AUXILIARY FEEDWATER MODIFI-  
CATION TEST

Mr. Mark Padovan of the Nuclear Regulatory Commission and Ron Colombo had discussions today, August 17, 1982, and agreed to testing the Auxiliary Feedwater header modifications. The testing will include a full flow Auxiliary Feedwater flow test and observations to detect water hammer effects.

I understand that this is the final action SMUD must complete prior to receiving approval from the Nuclear Regulatory Commission staff for Rancho Seco to proceed to 100 percent power. Completion of the above tests should be accomplished August 18, 1982.

John J. Mattimoe  
Assistant General Manager  
and Chief Engineer
