Subject: Request for Information

As part of Cotton & Company's engagement to audit NRC's fiscal 1991 financial statements we are attempting to identify all computer systems and subsystems used in 1991 to process accounting data and planned to process data in the future. At times we seem to be receiving conflicting information. Please provide us with DIRM's Mission Statement and schedules detailing:

System Inventory
One and five year planning documents
Physical layout of the systems if not part of the system inventory
