REPORT
August 5, 1982 RDS

*XR-77
Amend. 5*

Ms. Betty L. Wright
Licensing Officer
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Application Amendment XR-77

Dear Ms. Wright:

NRC License No. XR-77 authorizes General Electric to export nuclear equipment to ENEL for the Caorso nuclear power station in Italy.

General Electric hereby requests amendment of XR-77 to authorize three additional intermediate consignees, extend the expiration date and make several other revisions of a minor nature.

The requested revisions are listed as follows:

1. Extend the expiration date to 1 January 1988.
2. Change the M/C from 838 to 873.
3. Revise the names and addresses of the currently authorized intermediate consignees to read:

Joint Venture Office per Centrale Nucleare di Caorso
Genova-Sampierdarena, Italy

Ansaldo Meccanico Nucleare, s.p.a.
Genova, Italy

4. Add the following intermediate consignees:
 - a. AGIP Nucleari
Milano, Italy
 - b. FIAT - T.T.G. s.p.a.
Torino, Italy

8208240082

August 5, 1982

- c. Fabbricazioni Nucleari s.p.a.
Bosco Marengo (Allesandria) Italy

NOTE: These firms will receive fuel bundle hardware for use in fabricating Caorso reloads.

All other conditions remain unchanged. One-page format is desirable. An amendment pursuant to this request by September 13, 1982 will enable GE to comply with export commitments.

Please call if additional information would be helpful to this action.

Very truly yours,

B. D. Wilson, Manager
Government Relations and
Export Licensing
