CORRECTED COPY

Mr. R. H. Engelken, Director
U.S. Nuclear Regulatory Commission
Region V
202 Walnut Creek Plaza
Walnut Creek, CA 94591

Subject: NRC I & E Bulletin No. 81-02, Supplement 1
Failure of Gate Type Valves to Close Against Differential
Pressure
File: 81-055-026; D.4.01.1

Reference: ANPP-18335, JMA/WFQ, dated July 7, 1981

Dear Mr. Engelken:

In regards to subject bulletin, no W-EMD gate valves are used in the PVNGS design and therefore no valves other than those reported by the reference letter in response to IE Bulletin 81-02 have been identified.

Approximately 25 man-hours were expended in review and preparation of our response to this bulletin supplement.

This completes our actions to be taken by construction permit holders (items 1 and 2 of the subject bulletin) and no further action is required.

Very truly yours,

E. E. Van Brunt, Jr.
APS Vice President,
Nuclear Projects
ANPP Project Director
