Subject: PROJECT CHARIOT SUMMARY

This responds to the September 11, 1992, telephone call between NMSS, RV, and RIV wherein RIV was assigned the responsibility of retrieving from NRC archives the retired USGS docket file License No. 5-1399-3 and summarizing all available information specific to the Project Chariot Site. The attached information was gleaned from both the retired License No. 5-1399-3 and the USGS current broad scope License No. 05-01399-08. For your convenience a summary of the correspondence (letters, memorandums, inspection notes, inspection reports, teletypes) in these files has been put into a table format.

Contained in the docket files we did locate a large map of the exact coordinates of the site provided by USGS in response to AEC's questions and concerns.

Copies of all the above documents referenced in Region IV's summary has been faxed to Region V today. The summary prepared by Region IV, copies of all referenced documents in the summary, retired docket files, and the USGS map described above has been mailed to you today by express mail.

Should you have any questions, or need additional information, please contact me at (817) 860-8197.
