Date Signed

SUMMARY

Scope:

This routine, announced inspection was conducted in the area of the Physical Security Program for Power Reactors. Specific areas evaluated were: Management Support; Protected and Vital Area Barriers, Protected Area Access Control; Alarm Stations; and Security Training.

Results:

In the areas inspected, violations or deviations were not identified. Violation 93-07-01 was closed (Failure to compensate for an open and accessed protected area gate). The licensee's corrective action was deemed adequate. (See Paragraph 2, Report Details.)

The licensee's security program was determined to be effective in providing an acceptable level of protection for the station's resources. The performance of the security force was reflected in their professionalism in carrying out operational duties and the proficiency of their training program and tactical exercises.
