NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

8/17/82

Docket No. 50-312

MEMORANDUM FOR: Richard L. Black, Office of the Executive Legal Director
FROM: James P. Knight, Assistant Director for Components and Structures Engineering, Division of Engineering
SUBJECT: SUPPLEMENTAL STAFF TESTIMONY ON RANCHO SECO MEMORANDUM AND ORDER DATED MARCH 8, 1982 - HPI NOZZLE CYCLES

In response to the Rancho Seco ASLAB Memorandum and Order dated October 7, 1981, your April 9, 1982 memo transmitted John F. Stolz's affidavit to the ASLAB. The purpose of the affidavit was to provide the current status of the NRC staff's review of SMUD's initial response to Item No. 6 of the Memorandum and Order. Item No. 6 requested the following information: "SMUD and staff schedules for HPI analysis". In particular, the Board was concerned with the maximum allowable number of thermal cycles on the HPI nozzles.

In a telephone conference with Dr. Buck of the ASLAB on August 13, 1982, Dr. Buck requested a status report on the staff's review of the licensee's July 2, 1982 HPI nozzle analysis submittal. Accordingly, the enclosed testimony from Shou-Nien Hou is provided to supply the requested information.

A handwritten signature in cursive script, appearing to read "J. Knight".

James P. Knight, Assistant Director
for Components and Structures Engineering
Division of Engineering
