January 12, 1994

Mr. Leif Norrholm
Chief, Vendor Inspection Branch
Division of Reactor Inspection
and Licensee Performance
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Dear Sir:

Subject: Disposition of Error Notices Received From Boeing Computer Services

- References:
1. NRC letter to Chief Civil Engineer, Bechtel Gaithersburg Office, Docket No. 99900519
 2. NRC letter to Mercedes Dumlao, Bechtel Computer Services Library

We are in receipt of the referenced letters dated December 16, 1993.

This is a coordinated response for all Bechtel entities receiving letters on this subject.

Because of the intervening holiday season and the associated absence of many of our key employees during this time, we have been unable to complete a summary of our evaluations and responses to the subject error notices. This task turns out to be significant due to the many error notices, many projects we have worked on, and the various Bechtel offices performing design work for nuclear projects. Accordingly, we respectfully request a 30-day extension for this effort.

In your concluding paragraph you discuss the public reporting burden for this collection of information at an estimated average of eight hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Further, you have invited comments on this burden estimate. In this regard, we feel obligated to observe that your estimate of eight hours per response appears significantly inadequate.
