RE: 40-8781

Dear Sirs:

The Draft Environmental Statement related to the issuance of a Source and Byproduct Material License for Teton Exploration Drilling, Inc. - Teton Project was received in this office July 22, 1982. Thank you for giving us the opportunity to review the report.

The major concern of the Wyoming Recreation Commission (WRC) would be the possible impacts on the recreation resource in Converse and Natrona counties. However, because the work force will be small (approximately 50 workers) and the proposed project area will not be located near any identified high value recreation lands, these adverse impacts should be minimal. The WRC recommends clearance for this project as it currently stands.

If you have any questions concerning this recommendation, please contact this office.

Sincerely,

Alvin F. Bastron
