Dear Mr. Colmar:

Biweekly Report for LER Screening Project

The biweekly report for the period ending June 19, 1981, for the LER Screening Project is enclosed. Please note that beginning with this report, the listing of LERs screened and identified as potentially significant is being generated by a computer program. Four of the 80 events were identified as potentially significant and are flagged accordingly. Subsequent biweekly reports will present a slightly modified format where the potentially significant and non-significant LERs will be listed as two separate groups.

Sincerely yours,

Gary T. Mays for
