A-95 DEC 2-7 1972 W. R. Grace & Company Davison Chemical Division Post office box 188 Pompton Plains, New Jersey 07444 SUBJECT: NOTICE OF LICENSE EXPIRATION Gentlemen: Notice is given that Source Material License No. STA-422 expires on February 28, 1973. If you desire to continue your program using source material(s), an application for renewal of the license should be filed with this office. It is to your advantage to file such an application at least thirty (30) days before the expiration date of your existing license. The application should be submitted using Form AEC-2 (copy enclosed), in accordance with the instructions provided with the form. Your program will then be covered by your existing license until action is taken on your application for license renewal (Title 10, Code of Federal Regulations, Part 40, Section 40.43(b)). If an application is received less than 30 days prior to the expiration date of your license and cannot be processed before your existing license expires, this could result in your possessing source material without a valid license. If you do not wish to renew your license, please complete the enclosed form "Certification of Status of Source Material Activities under United States Atomic Energy Commission Source Material License No. STA-422 " and return it to this office. If you have obtained an amendment which has extended the expiration date of the above license or if a new license has been issued which supersedes the above license, please disregard this notice. This notice of your license expiration is sent for your convenience and it should not be interpreted that similar notices will be sent in the future. The responsibility for timely submission of an application for license renewal remains with the licensee. Sincerely, James C. Malaro, Chief Materials Branch Directorate of Licensing Enclosures: 1. 10 CFR Parts 20 and 40 2. Form AEC-2 3. "Certification ..." 8208250110 820617
