Re: #70-3070, Draft EIS, for Claiborne Enrichment Ctr., Homer, LA

Dear Sir:

I am concerned about the Louisiana Energy Services plant proposed for Homer, LA. I understand that in the 400-page DEIS, Forest Grove and Center Springs, two communities located within one half mile of the proposed site are not even shown on any of the 38 maps or diagrams and there is only one reference to them in the text!

This is unbelievable: these two communities that would be so deeply affected are practically completely ignored! Why does the DEIS on the LES uranium enrichment plant not include evaluation of the social and economic impact on Center Springs and Forest Grove?

This means that the DEIS is totally inadequate, incomplete, and unacceptable. The final EIS on the proposed LES plant must evaluate the social and economic impact on these two nearby communities.

I await word that this unacceptable deficiency in the DEIS will be remedied: that a full analysis of the social and economic impact on Center Springs and Forest Grove will be included in the final EIS.

Sincerely yours,

Ben Minor
