Chief, Enrichment Branch  
Division of Fuel Cycle Safety and Safeguards  
Office of Nuclear Material Safety and Safeguards  
U. S. Nuclear Regulatory Commission  
Washington, D C 20555

Dear Sirs:

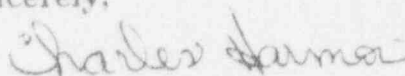

I want to write you and express my support for the Claiborne Enrichment Center proposal to build a uranium enrichment plant in Homer.

I have read much of the information that has been circulated in the community, and consider the proposal one that is reasonable and is worthy of supporting.

I do expect your agency to enforce the rules that would safeguard the health of our community, and the well being of the workers.

I am of the opinion the large majority of the people of Claiborne Parish support this project. I believe that you should approve this project just as soon as you are satisfied that all laws and environmental safety rules are obeyed.

Sincerely,

Charles Harmon
