License No. 21-01103-04  
Docket No. 030-02003

Dear Mr. Read:

SUBJECT: NRC INSPECTION REPORT NO. 030-02003/94001(DRSS)

This refers to the special safety inspection conducted by Mr. M. F. Weber of this office on January 5 and 6, 1994, to review the corrective actions implemented after our April 26 through May 4, 1993 inspection of St. Joseph Hospital. The inspection also included a review of activities authorized by NRC Material License No. 21-01103-04 at St. Joseph Campus and Flint Osteopathic Campus. At the conclusion of the inspection, the preliminary findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities were found to be in violation of NRC requirements, as specified in the enclosed Notice. A written response is required.

An area of concern regarding the effectiveness of your Radiation Safety Officer was also identified. As discussed in the enclosed report, we are concerned that your Radiation Safety Officer may not be serving in an effective manner at Flint Osteopathic Campus. This could easily lead to a degradation of safety in the nuclear medicine department. Therefore, in your response to this letter, please indicate how you plan to increase the effectiveness of your Radiation Safety Officer at Flint Osteopathic Campus.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
