JJ

We have been advised that the Atomic Energy Commission has on hand at the Fernald, Ohio site large quantities of thorium bomb reduction residues. We also understand that these residues are to be disposed of, or moved.

Our company is interested in obtaining these residues from the Commission for processing. In order to evaluate, we request a 100 pound sample to be shipped to us at our plant,

Rare Earths, Inc.
c/o Davison Chemical Co.
Curtis Bay, Baltimore, Md.

Attention: Mr. R. M. Mandle.

Any questions concerning this should be directed to Mr. David P. Barrett, Davison Chemical Company, Baltimore 3, Maryland.

Very truly yours

Richard M. Mandle
