Attention: Mr. Robert Kirkman,  
Compliance Division

Gentlemen:

In the process of handling a Workmen's Compensation matter for a client who is employed at the Davison Chemical Division of WR Grace, Co., Wayne, New Jersey, it is necessary to inquire with regard to the existence of any radioactive materials used at this plant during July, August 1965.

Our client sustained burns at that time to his right hand, and the information which we request is with regard to this injury. He states to us that the burns are from "acid and radioactive sand at 360° F".

Thanking you for whatever cooperation you may be able to furnish us, we remain

Very truly yours,

MARCUS & LEVY
