Mr. James Zimmerman  
Assistant Director  
Export/Import and International Safeguards  
Office of International Programs  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Subject: XSNM-1822, Japan.

Dear Mr. Zimmerman:

We submitted an application to cover the export of fuels to three (3) TRIGA reactor locations in Japan. Subsequently the Japanese Government has indicated it does not choose to provide assurance on such fuels on a generic basis but prefers instead to provide assurance on a specific case by case basis. Accordingly, XSNM-1822 is being changed to now export fuels only to JAERI.

In response to a telephone request by your staff, this confirms that XSNM-1822 for Japan should cover only one ultimate consignee--Japan Atomic Research Institute Tokai Research Establishment. The ultimate end use will more specifically be for the JAERI NSRR Reactor. It should cover 313.23 gm. U-235 contained in 1573.81 gms. uranium enriched less than 20%.

We will appreciate it if you will expedite the issuance of this license in order that we may export the fuel elements in question.

If you have additional questions, please contact me at 714-455-2823.

Very truly yours,

*William R. Mowry*
