VECTRA

January 20, 1994

C. Ross Chapell
Transportation Branch - NMSS
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr Chapell:

I am writing to tell you of some recent changes at Pacific Nuclear. On January 6, 1994, VECTRA Technologies, Inc. was created from the acquisition by Pacific Nuclear of three ABB Impell Companies, including ABB Government Services, Inc. (GSI). Pacific Nuclear management selected the name VECTRA to symbolize the magnitude of its commitment and direction to being a leader in meeting the needs of our clients, our employees and our industry. During the past six months, the Company has worked very hard to create a smooth transition for all its stakeholders. The new company and each of its 1100 employees is firmly established in the best traditions of Pacific Nuclear and ABB GSI.

VECTRA's President and Chief Executive Officer, Mike Scholtens, has committed that the three key elements of the company's foundation - Client Satisfaction, Value and Technology - will remain and be even stronger with the merger. All the officers, managers and employees of VECTRA are committed to these values, and our Total Quality Leadership program will provide the measurements of our mutual success.

We are further committed to being a very active member of the DOE complex and commercial nuclear industry standards committees, key industry forums, conferences, and other industry related activities. We are also committed to ongoing investments in new technologies and services to solve key engineering and environmental issues facing our clients in the industry.

I have enjoyed my relationship with you and your company over the previous years and look forward to working with you over the next many years. As we complete our transition, if you or your staff have any questions, please call me at (206) 874-2235.

Very truly yours,

VECTRA

Charles J. Temus
