Mr. Steven E. Miltenberger
 Vice President and Chief Nuclear
 Officer
 Public Service Electric and Gas
 Company
 Post Office Box 236
 Hancocks Bridge, New Jersey 08038

Dear Mr. Miltenberger:

SUBJECT: EVALUATION OF INSERVICE TESTING RELIEF REQUEST FOR THE MAIN STEAM
 SAFETY RELIEF VALVE TESTING REQUIREMENTS, HOPE CREEK GENERATING
 STATION (TAC NO. M86733)

The enclosed Safety Evaluation (SE) provides the results of the U.S. Nuclear Regulatory Commission staff's review of the relief request submitted by the Public Service Electric and Gas Company (PSE&G) in a letter dated June 4, 1993. This relief request proposed setpoint testing the pilot stage of 7 of the 14 main steam safety relief valves (SRVs) at the Hope Creek Generating Station every 5 years. The licensee also submitted a license amendment application in a letter dated May 21, 1993, to change the surveillance testing of the main steam SRVs in the Technical Specifications. The license amendment application will be evaluated in a separate SE. A telephone conference was held with the licensee on October 15, 1993, to discuss questions from the staff and the New Jersey Department of Environmental Protection. The licensee documented its responses to the questions in letters dated October 29, 1993 and November 16, 1993.

The relief requested in PSE&G's June 4, 1993 letter has been granted pursuant to 10 CFR 50.55a(a)(3)(i).

Sincerely,
 /S/

Charles L. Miller, Director
