

April 20, 1982

Mr. Darrell G. Eisenhut, Director Division of Licensing U.S. Nuclear Regulatory Commission Phillips Dailding 7920 Norfolk Avenue Bethesda, Maryland 20014

SUBJECT: Zion Station Unit 2 Rod Swap Test Report NRC Docket No. 50-304

Dear Mr. Eisenhut:

Attached are 6 copies of Zion Unit 2 Cycle 6 Rod Swap Report, January 1982 (Proprietary) and 40 copies of the same report (Non-Proprietary). Also attached are a Westinghouse approval letter and affidavit (Non-Proprietary).

The attached information provides both predicted and measured results for the first time use of the rod swap technique for Zion Unit 2. This fulfills a reporting requirement imposed by the NRC's March 12, 1981 approval of use of the rod swap technique at Zion.

As this submittal contains information proprietary to Westinghouse Electric Corporation, it is supported by previously submitted affidavits signed by Westinghouse, the owner of the information. The affidavits set forth the basis on which the information may be withheld from public disclosure by the Commission and address with specificity the considerations listed in paragraph (b)(4) of Section 2.790 of the Commission's regulations.

Accordingly, it is respectfully requested that the information which is proprietary to Westinghouse be withheld from public disclosure in accordance with 10CFR Section 2.790 of the Commission's regulations. Correspondence with respect to the proprietary aspects of the Application for Withholding or the supporting Westinghouse affidavits should reference CAW-82-20, and should be addressed to R. A. Wiesemann, Manager, Regulatory and Legislative Affairs, Westinghouse Electric Corporation, P. O. Box 355, Pittsburgh, Pennsylvania 15230.

Very truly yours,

F. H. Lentine

F. G. Lentine Nuclear Licensing Administrator Commonwealth Edison Company
