Attn: Mr. L. H. Barrett, Deputy Program Director
U. S. Nuclear Regulatory Commission
c/o Three Mile Island Nuclear Station
Middletown, Pennsylvania 17057

Dear Sir:

Three Mile Island Nuclear Station, Unit 2 (TMI-2)
Operating License No. DPR-73
Docket No. 50-320
Schedule for Completing Long Term Action Items
Identified in Licensee Event Report 82-020/01L-0

Licensee Event Report (LER) 82-020/01L-0 dated June 26, 1982 identified several long term corrective actions that needed to be taken as a result of this LER. Additionally, this LER committed to provide a schedule for completing these items. This schedule, the preparation of which was delayed as discussed with Mr. J. Wiebe, Senior Resident Inspector (TMI-2), U. S. Nuclear Regulatory Commission on August 10, 1982, is provided as an attachment to this letter.

Sincerely,

B. K. Kanga
Director, TMI-2

Long Term Corrective Action

Estimated
Completion Date

1. Modify BWST enclosure to provide protection from the inleakage of rainwater and local ground flooding. October 29, 1982

2. Update the Flood Emergency Procedures to incorporate plugging of the BWST enclosure sump drain in the event of flooding at TMI-2. September 30, 1982

3. Review the Technical Functions Division Task Record System to determine, if any, additional items are carried which affect the operation of TMI-2 and transfer them to the TMI-2 Site Operations Action Item tracking system. October 30, 1982

4. Review open items for turnover inspections of other engineering changes to identify, if any, significant deficiencies exist. September 30, 1982

5. Review engineering changes made during the recovery period prior to implementation of the existing turnover procedure to determine if any significant open items exist. December 31, 1982
