Attention: R.D. Thomas

Dear Sir:

In response to your letter of July 15, 1982, and pursuant to the provisions of 10 CFR 2.201, we submit the following for your approval.

1) CORRECTIVE STEPS WHICH HAVE BEEN TAKEN AND THE RESULTS ACHIEVED;

On July 12, 1982 Paul Smith our Radiation Safety Officer and John McCormick flew to the Virgin Islands and spent two weeks at the Hess Oil St. Croix jobsite, where they audited all personnel, conducted safety meetings, and spent better than 50 hours observing technicians performing Industrial Radiography. Specifically they were checking to make sure that (1) Camera was locked and properly surveyed after each exposure. (2) Radiation safety was not sacrificed for production.

During unannounced audits personnel were observed to be following Plant Inspection Operating and Emergency Procedures to the letter.

(11) CORRECTIVE STEPS TO AVOID FURTHER ITEMS OF NON-COMPLIANCE;

Management will spend more time conducting audits and working with personnel in the field to make sure that they are operating in a safe manner.

(111) THE DATE FULL COMPLIANCE WILL BE ACHIEVED;

John McCormick will spend the months of September and October at the St. Croix jobsite. Full compliance will be achieved by Nov. 1, 1982.

If you have any questions concerning above statements please contact the undersigned.

Troy J. McCormick
