Re: McGuire Nuclear Station, Unit 1
Docket No. 50-369
Personnel Exposure and Monitoring Report

Dear Mr. O'Reilly:

Pursuant to Technical Specification 6.9.1.5, attached is a tabulation on an annual basis (for 1981) of the number of station, utility and other personnel (including contractors) receiving exposures greater than 100 mrem/yr and their associated man rem exposure according to work and job functions. Dose values are based on self-reading pocket dosimeter totals.

This tabulation supplements the requirements of 10 CFR 20.407 which were submitted by my letter to Mr. Harold S. Bassett, NRC/MPA dated March 9, 1982.

Very truly yours,

William O. Parker, Jr.
