

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

CFO

December 17, 1993

The Honorable Bob Franks
Member, United States House
of Representatives
73 Main Street, Suite 4
Woodbridge, New Jersey 07095

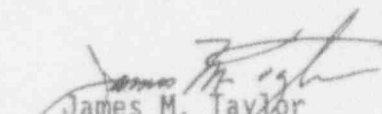

Dear Congressman Franks:

I am responding to your letter dated November 17, 1993, concerning correspondence from your constituent, Mr. Emanuel Goldfarb, of the Goldfarb Company, Inc. Mr. Goldfarb is protesting the fee assessed for an inspection conducted by the Commission of his operations under License STC-1468.

Enclosed is a copy of our letter dated December 2, 1993, to Mr. Goldfarb. Mr. Goldfarb maintained that the fee should be cancelled since he had not brokered any source material since 1992 and was no longer in business. The NRC is required by the Atomic Energy Act of 1954, as amended, to determine that licensed radioactive material is used in a manner which protects the public and the licensee. As part of its regulatory oversight, the NRC performs close-out inspections when there is a possibility of residual contamination. We have informed Mr. Goldfarb that the inspection was valid and that the inspection fee was properly assessed.

If I can be of further assistance, please let me know.

Sincerely,

James M. Taylor
Executive Director
for Operations
