Dr. Edward Shum
U. S. Nuclear Regulatory Commission
7951 Eastern Avenue
Silverspring, MD

*Return to:
396-SS*

Dear Dr. Shum:

This will confirm our telephone conversation today relative to our plans to meet with you at 9:00 a.m., on Friday, August 6, 1982, at your office. The purpose of this meeting is to discuss the experimental procedures being implemented at GE - Wilmington for measuring airborne uranium particle size distributors and solubility characteristics. We would like to have your comments relative to how we might establish a "sample splitting" arrangement with the NRC for confirmation of our measurements.

Accompanying me on this visit will be Dr. Paul Stansbury, who has been with GE since April, in Ed Power's former position.

Sincerely,

M. E. McLain, Manager
Nuclear Safety Engineering
