0 2	L While in Mode 1, one diesel generator was inoperable due to maintenance. T.S. Section
0 3	3.7.2 requires testing of the operable diesel generator at least every 8 hours. A
0 4	25% tolerance was applied erroneously to this test period, resulting in an extension
0 5	L of the time limit on July 2 and 16, 1981, and on February 9, 1982. The extended
0 6	L test periods did not affect public health or safety.
