PRAIRIE ISLAND NUCLEAR GENERATING PLANT
Docket Nos. 50-282 License Nos. DPR-42
50-306 DPR-60

Supplemental Information Related to
License Amendment Request dated June 14, 1982

The License Amendment Request dated June 14, 1982 required two documents to support the change. XN-NF-81-06(P) was submitted on June 15, 1982, and supported operation up to 47 GWD/MTU. The attached document, XN-NF-81-06 Supplement 1, supports operation from 47 GWD/MTU to 50 GWD/MTU.

Additional analyses have been performed which demonstrated that the results of the current analyses, as described in XN-NF-81-06(P) and XN-NF-81-06 Supplement 1, are conservative with respect to the clad swelling and block-age models given in NUREG-0630.

If further information is required, please notify us.
