DOCKET NUMBER

PETITION RULE PRM - 50-32
(47 FR 27371)

Attn: Docketing & Service Branch

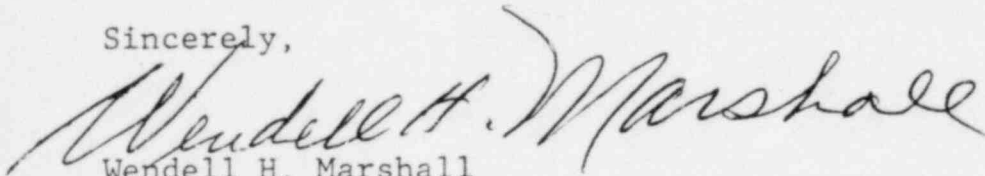

It has been brought to our attention that the Federal Register for Thursday, June 24, page #27371 contained matters concerning the Electro Magnetic Pulse.

It will be greatly appreciated if a photostatic copy of this were made available to the Mapleton Interveners.

In addition, the Mapleton Interveners request that they be given an additional month to prepare comments concerning the EMP. This is an important and complex issue and we, in the past, have discussed this by letters and telegrams with the Nuclear Regulatory Commission and we are interested in getting a rule change so that the Electro Magnetic Pulse can be considered on the Nuclear Power Plant at Midland, Michigan.

Thank you for your assistance.

Sincerely,

Wendell H. Marshall
President
Mapleton Interveners

The Midwest Environmental Protective Associates (MEPA) desire to comment on the Electro Magnetic Pulse phenomena which appeared in the Federal Register Thursday, June 24 on page #27371. Since we do not have a copy of this Federal Register from June 24, we would appreciate receiving such. MEPA desires to enter comments on this problem and since they had not received a copy of the Federal Register of June 24, they request that they be granted additional time of at least one and one-half months. Thank you.

Sincerely,

Steve J. Gadler, P.E.
President, MEPA
