U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

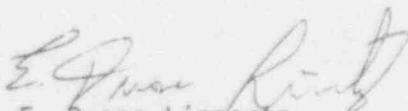

Sir;

Having been alerted by the U.S. Council for Energy Awareness of the proposed construction of the Clairborne Enrichment Center (CEC) to be located in my home state of Louisiana, I took the time to read over an abstract of the Draft Environmental Impact Statement, as well as a copy of the Summary and Conclusions of the same.

I am in full support of the construction of such a facility. I sincerely hope that the citizens of the area support it as well. I have been a professional in the nuclear power field since 1986, after leaving the U.S. Navy Nuclear Power Program.

Certainly the privatization of enrichment and the construction of facilities such as the CEC will prove a boon to the industry and to the local economy as well.

Sincerely,

  
E. Duane Linnartz
