Gentlemen:

This refers to your letter dated May 19, 1982, in response to our letter dated April 21, 1982.

Thank you for informing us of the corrective and preventive actions you documented in response to our correspondence. On May 26, June 2 and 22, 1982, Mr. Davis of this office discussed your response with Mr. Frank Smith, your consultant, by telephone. From these discussions, we understand that the average Krypton-85 concentration released from your stack was  $3 \times 10^{-6}$  microcuries per milliliter. It is our understanding that you are evaluating the concentration at your site boundary to assure compliance with 10 CFR 20.106. Furthermore, we understand that you will review your air dispersion calculations whenever operating conditions change to assure compliance with 10 CFR 20.106.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:

*Myra Campbell*
