Docket Nos. 50-245; 50-336; 50-423

Mr. John F. Opeka
Executive Vice President - Nuclear
Northeast Nuclear Energy Company
P. O. Box 270
Hartford, Connecticut 06141-0270

Dear Mr. Opeka:

SUBJECT: Combined Inspection Nos. 50-245/93-31, 50-336/93-26 and 50-423/93-28

This letter refers to the safety inspection conducted by Mr. J. Kottan of this office on November 29 to December 3, 1993, of activities authorized by NRC License Nos. DPR-21, DPR-65 and NPF-49 at the Millstone Station, Units 1, 2 and 3, and to the discussions of our findings held by Mr. Kottan with Mr. R. Factora and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection are important to public health and safety, and are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

In addition, our Mobile Laboratory was brought to your site and used by the inspector to make certain independent measurements. The basic purpose of these independent measurements is to verify your capability for analyzing radioactive effluents, and to achieve and maintain comparable methods of analyses between your facility and the NRC. The data from these measurements are included in this report with the exception of the wet chemistry results, which will be documented in a subsequent inspection report.

Within the scope of this inspection, you had in place effective programs for measuring radioactivity in process and effluent samples. No violations of regulatory requirements were observed and no response to this letter is required.

Sincerely,

Original Signed By:
James H. Joyner
