Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 50-348/94-01 AND 50-364/94-01

This refers to the inspection conducted by T. M. Ross of this office on January 1-21, 1994. The inspection included a review of activities authorized for the Farley Nuclear Plant. At the conclusion of the inspection, and at various times during the inspection, findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The enclosed Inspection Report identifies activities that violate NRC requirements that will not be subject to enforcement action because the licensee's efforts in identifying and correcting the violations meet the criteria specified in Section VII.B of the Enforcement Policy.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
