Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 50-416/94-01

This refers to the inspection conducted by M. D. Hunt of this office on January 3-7, 1994. The inspection included a review of activities authorized for your Grand Gulf facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

This report concludes that you are implementing an effective motor operated valve program. There are concerns with the grouping methodology used in the program, along with concerns over the timeliness in evaluation of test data, use of 0.3 valve factors, and the use of static testing for retesting valves to verify valve capability and switch settings.

Within the scope of the inspection, violations or deviations were not identified.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
