Attention: Mr. J. C. Delaney  
Chief, Materials Section  
Licensing Branch  
Division of Civilian Application

Reference: Docket No. 40-1389, CAL:ND

Gentlemen:

In accordance with the terms of the Source Material License granted to Clevite Research Center, No. C-3790 dated August 8, 1957, Clevite Research Center is licensed to have possession of, and title to, 200 pounds of natural uranium during the term of the license (presumed to be August 8, 1957 through August 1, 1958). It is noted however that the letter by which the license was transmitted authorizes procurement of 200 pounds of natural uranium from the Commission prior to January 1, 1958.

It now appears that prior to January 1, 1958 Clevite Research Center will not have acquired in excess of 50 pounds of natural uranium. However, our plans encompass the use of additional amounts during 1958, therefore it is requested that the time limit to procure the entire 200 pounds of natural uranium be extended to August 1, 1958.

It will be appreciated if you can arrange to give this matter your early attention. Please direct all correspondence to the attention of the undersigned.

Yours sincerely,

CLEVITE RESEARCH CENTER

Mr. Di Negro of Clevite was a little confused  
as to the meaning of the allocation letter as  
against his license. He has been procuring the  
material from Mallinckrodt and will continue  
to do so. He will not exercise the letter of auth.  
to procure from the Commission.

M.D.
