AUG 24 1960

Wah Chang Corporation
Albany, Oregon

Attention: Mr. Stephen Yih

Gentlemen:

This refers to the inspection conducted on June 14, 1960, of your activities authorized under AEC Source Material License No. C-4589.

It appears that certain of your activities were not conducted in full compliance with the requirements of the AEC's "Standards for Protection Against Radiation," Part 20, Title 10, Code of Federal Regulations, in that:

1. The storage shed which contained approximately 2639 pounds of thorium oxide was not posted as required by Section 20.203(e)(2), "Caution signs, labels and signals."
2. The 30 gallon and 3 gallon thorium storage containers within the storage shed were not labeled as required by Section 20.203(f)(2), "Caution signs, labels and signals."

These deficiencies were brought to your attention by the inspector and you stated that the storage shed and individual containers would be properly posted and labeled. Should you have any questions about these matters, please feel free to write us. Posting and labeling will be reviewed during the next inspection of your facilities.

Your cooperation with us is appreciated.

Very truly yours,
