Docket No. 50-461

U.S. Nuclear Regulatory Commission
Document Control Desk
Washington, D.C. 20555

Subject: Clinton Power Station, Unit 1
Facility Operating License NPF-62
January 1994 Monthly Operating Report

Dear Sir:

Please find in Attachment 1 the Monthly Operating Report for Clinton Power Station, Unit 1, for the period ending January 31, 1993.

In addition, Attachment 2 contains a clarification to the Unit Shutdown summary provided in the report for December 1993. A reactor scram which occurred during plant startup from the refueling outage prior to synchronizing to the grid was not included in the December 1993 report. Time from the scram to return to criticality is considered forced outage hours. This attachment is provided to clarify the types and duration of shutdown hours for December for shutdown number 93-05.

Sincerely yours,

R. F. Phares
Director - Licensing

MCH/krm
