Docket No. 030-03426

During an NRC inspection conducted on November 30 and December 2, 1993, with continuing NRC review through December 22, 1993, violations of NRC requirements were identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violations are listed below:

1. Condition 12. of License No. 48-02122-05 names certain individuals as authorized users of licensed material.

Contrary to the above, on December 2, 1993, individuals not named in License Condition 12. as authorized users routinely used licensed material at your institution.

This is a Severity Level IV violation (Supplement VI).

2. 10 CFR 35.60(b) requires that, to identify its contents, a licensee conspicuously label each syringe, or syringe radiation shield that contains a syringe with a radiopharmaceutical, and that the label show the radiopharmaceutical name or its abbreviation, or the clinical procedure to be performed, or the patient's name.

Contrary to the above, on December 1, 1993, the licensee did not label a syringe or syringe shield containing Tc-99m (to show the radiopharmaceutical name, the clinical procedure or the patient's name).

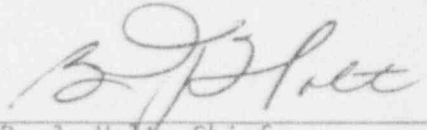

This is a Severity Level IV violation (Supplement VI).
