Mr. L.M. Mills, Manager
 Nuclear Licensing
 Tennessee Valley Authority
 400 Chestnut Street Tower II
 Chattanooga, TN 37401

Dear Mr. Mills:

SUBJECT: NRC ACCEPTANCE OF THE TVA QA TOPICAL REPORT (REVISION 5)

Your letter of May 7, 1982 transmitted Revision 5 to the TVA topical report TVA-TR75-1, "Quality assurance Program Description for the Design, Construction and Operation of TVA Nuclear Power Plants." The TVA topical report, through Revision 4, was previously reviewed and accepted by the NRC for referencing in license applications as indicated in our letter of August 18, 1980. Revision 5 reflects quality assurance program, organization, and editorial changes.

Based on our review and evaluation of Revision 5, we find that the criteria in Appendix B to 10 CFR Part 50 are met. Your amended topical report is, therefore, acceptable, and you may implement it upon issuance. The QA program interface with the offsite radiological hygiene function will require resolution in the next revision of the report.

For new license applications, we will compare Revision 5 to the latest Revision of the Standard Review Plan (NUREG-0800). The results of this review will be forwarded to you upon completion.

Should regulatory criteria or regulations change such that our conclusions about this topical report are invalidated, we will notify you. You will be given the opportunity to revise and resubmit it should you so desire.

Please enclose a copy of this letter in the report, renumber the report TVA-TR75-1A, Revision 5, and transmit 36 copies to the NRC. In your transmittal letter, indicate to which plants Revision 5 will be applicable.

Should you have any questions regarding our review or if we can provide assistance, please contact Mr. Jack Spraul on (301) 492-9489.

Sincerely,

Original signed by
 Walter P. Haass

Walter P. Haass, Chief
