To Whom It May Concern:

Re: Upgrade of Ceramic Materials Department Products from Industrial to Nuclear Products

In order for you to utilize Ceramic Materials Department industrial products in nuclear applications, 3M can provide technical documentation, such as Certificates of Conformance or Certificates of Analysis for each order. The charges for these services are \$1250 plus \$150 per hour.

These analyses will be based on the lot numbers of the products you have purchased. If purchased through distribution, you will need to supply 3M with the specific lot numbers and quantities you receive. If purchased directly from 3M, you will need to specify your documentation requirements on the purchase order.

Thank you for your continued support and use of Ceramic Materials Department/3M Fire Protection Products and services.

M. A. Supina
