Subject: Westinghouse Owners Group  
Transmittal of WOG LCM/LR Program Plan, Rev. 0

Dear Mr. Hoffman:

An initial meeting between the Westinghouse Owners Group (WOG) and the Nuclear Regulatory Commission Staff was held on August 18, 1993 to discuss the WOG program for License Renewal. At this meeting a copy of the WOG Life Cycle Management/License Renewal Program Plan, Revision 0, was informally provided to the staff for information. Also discussed was the need to establish formal points of contact between the NRC and WOG utilities and Westinghouse on WOG license renewal activities.

This letter transmits, per your request, Revision 0 of the WOG Life Cycle Management/License Renewal Program Plan for NRC information. These documents are being provided for information only. The Westinghouse Owners Group is neither requesting nor expecting a review of these documents by you or any other branch of the Nuclear Regulatory Commission. Should you or any other branch of the Nuclear Regulatory Commission determine that a review should be performed, the Westinghouse Owners Group Chairman must be contacted for concurrence. Failure to receive concurrence from the Westinghouse Owners Group Chairman prior to initiation of a review will result in a challenge by the Westinghouse Owners Group of any and all review fees associated with these documents. This Program Plan will be modified, as required, to reflect changes in the License Renewal regulatory requirements as well as other changes in the WOG program to support both License Renewal and Life Cycle Management program objectives. Any future revisions to this Program Plan will be transmitted to the NRC as they become available.
