Cleveland 8, Ohio

Subject: LICENSING REQUIREMENTS

Dear Mr. Gentry:

Our letter of April 16, 1957 requested additional information in support of your application for a byproduct material license (radiography source). To date, this requested information has not been received by this office.

As you know, the primary concern of the Atomic Energy Commission in discharging its licensing function is that radioisotopes be used and disposed of safely. The information requested in our letter is necessary for a thorough radiological hazard evaluation of your program.

Your immediate cooperation in this matter is requested in order to obviate suspensory action. Please supply us with the requested information by July 5, 1957.

Very truly yours,

for: G. W. Morgan, Chief
Isotopes Extension
Division of Civilian Application
