Docket No. 50-344

Mr. Bart D. Withers  
 Vice President Nuclear  
 Portland General Electric Company  
 121 S. W. Salmon Street  
 Portland, Oregon 97204

Dear Mr. Withers:

On December 11, 1980, the Commission issued Amendment No. 54 to Facility Operating License No. NPF-1 for the Trojan Nuclear Plant. That amendment, among other things, added requirements to provide for redundancy in decay heat removal capability in all modes of operation. An affected page was B 3/4 4-1 with an added page B 3/4 4-1a.

On January 21, 1981, Amendment No. 56 to NPF-1 was issued. That amendment resolved the requirements for license conditions and Technical Specifications for TMI Lessons Learned Category "A" items. Among the affected pages were B 3/4 4-1 and B 3/4 4-1a. In incorporating the Amendment 56 changes, the previously issued material added by Amendment No. 54 was omitted, thereby deleting page B 3/4 4-1a.

Page B 3/4 4-1a was again affected with issuance of Amendment No. 74 on June 10, 1982, which deleted certain requirements for pump and valve testing. At that time, the omission of the material issued by Amendment No. 54 was called to our attention by your staff. Therefore, we are reissuing pages B 3/4 4-1 and B 3/4 4-1a to correct our administrative error.

Please accept our apologies for any inconvenience this administrative error may have caused you.

Sincerely,

Original signed by

Charles M. Trammell, III  
 Project Manager  
 Operating Reactors Branch #3  
 Division of Licensing
