DOCKET NO. 50-312
RANCHO SECO NUCLEAR GENERATING STATION, UNIT NO. 1
PROPOSED AMENDMENT NO. 79 Rev. 1

In accordance with 10 CFR 50.59, the Sacramento Municipal Utility District is submitting a revision to Proposed Amendment No. 79. This revision supersedes the proposal submitted under our cover letter dated August 3, 1981. The District hereby proposes to amend its Operating License, DPR-54, for Rancho Seco Nuclear Generating Station, Unit 1, by submitting forty (40) copies of Proposed Amendment No. 79 Revision 1.

The purpose of this amendment is to clarify the SMUD Organization Chart as provided in the Technical Specifications. The chart now displays only those District departments and functions that are related to safety functions at Rancho Seco. This change will reduce the need to frequently update the chart in that organizational changes outside the areas that affect safety at Rancho Seco will not be presented on the chart.

This amendment is editorial and is submitted to the Commission to clarify the Technical Specifications. Footnote 2 of 10 CFR 170.22 exempts this change from scheduled fees.

If you have any questions concerning this proposal, please contact Mr. R. W. Colombo at the Rancho Seco Nuclear Generating Station.
