Dear Mr. Lee:

Subject: Adequacy of Station Electric Distribution System Voltages

The Commission, in a letter dated August 25, 1980, requested that you review the electric power system at Fort St. Vrain. The letter included guidelines for the required voltage analysis, and requested that you perform a test in order to verify the validity of the analytical results. After reviewing your submittals of data and analyses, we find the voltage analysis submitted on adequacy of station electric distribution system voltages to be acceptable.

Enclosed are our Safety Evaluation on the above subject and a report by EG&G dated July 1982 which forms part of our basis for accepting your submittals.

Sincerely,

Original signed by:

George Kuzmycz, Project Manager
Operating Reactors Branch #3
Division of Licensing
