Subject: Grand Gulf Nuclear Station
Unit 1
Docket No. 50-416
License No. NPF-29
1993 Self Assessment

GNRO-94/00026

Gentlemen:

The NRC SALP process provides Grand Gulf with a convenient opportunity to perform a retrospective review of overall site performance. While it is Grand Gulf policy to continually conduct self-assessments focused along departmental and functional lines, we have traditionally reserved the period at the end of a SALP cycle to perform an integrated review.

As expected, we have noted a distinct reduction in the level of NRC inspection at our facility during this SALP period. Although reduced inspection scrutiny is one of the benefits of strong performance, it also results in a corresponding reduction in the amount of docketed performance information for the SALP period. Whereas in the past, we have chosen not to docket our internal SALP period review results, for the current SALP period we believe it appropriate to provide the NRC with a broader information base than may be available through Inspection Reports and other docketed correspondence.

We hope you will find the enclosed review useful and informative.

Yours truly,

CRH/MJM/cg
