Reply to Notice of Violation License #34-26454-01

Dear Mr. Holt:

Mr. Reichhold contacted Lynn Tezak by telephone and requested additional information regarding our reply to notice of violation dated 12-14-93.

1. No new areas will be used for radioactive materials storage or animal housing unless an amendment is approved by the NRC.
2. Due to the very occasional usage of the basement area, a lock was inadvertently omitted. A lock was installed on Nov. 4.
3. Our consultants, UCI Inc. will inspect all records and documentation to ensure that all wipe tests are being performed as required.

All of these items from the notice of violation have been discussed during our radiation safety meeting and with UCI. All items were corrected immediately.

As suggested by Mr. Reichhold, we have submitted a request for approval to the NRC for a procedure for burial for contaminated carcasses.

Sincerely,

David Feiglin, M.D.
President and RSO
